

MATT TODD

White Rock City Councillor

Bold & open leadership

Serving you for the past 6 years has been a great honour.

As a direct result of my efforts, White Rock now has:

- **legal secondary suites**
- **transportation strategy** for improving conditions for walking, cycling and cars
- recommendations for council to better **communicate with citizens**
- draft bylaw for **protecting trees** and plans to create a view-sensitive tree planting program

- a leading role in the region for **smoke-free public spaces**
- full set of recommendations for **improving waterfront parking**
- direction to ensure there is enough **housing for seniors**, families and people with disabilities
- support for more **quality public art**

Many of these are just plans for action.

White Rock needs councillors who are able to stay **focused on following through** with these plans.

I have also advocated for changes:

- in higher standards for **building design** for a more attractive city
- for **engaging youth** in meaningful ways
- to make the City a leader in **environmental responsibility**

Provided leadership as a volunteer:

- directed the 2007 & 2008 **Spirit of the Sea Festival**
- created the opportunity for the **Sandcastle Competition** revival
- established a **new scholarship** with the Peninsula Arts Foundation
- designed **graphics** for the WRSS Foundation, Youth Ambassadors, Communities In Bloom, Spirit of the Sea Festival
- mentored **youth initiatives** and school projects

happy **VISION**

- special needs children or seniors needing more care can live close to their **families**
- both service workers and successful entrepreneurs can **live and work** in White Rock
- friendly place where people feel **accepted and included**

engaged VISION

- information about City decisions is **easy to access**
- strong sense of community and **connection** to City Council

healthy VISION

- **convenient** ways to get around in addition to driving
- streets are safe for **walking and cycling**

green **VISION**

- more **natural areas**
- **trees planted** in areas not view-sensitive

responsible **VISION**

- density placed only where services such as a **grocery store and public transit** are within short walking distance

economic **VISION**

- **more tourism activities** on the waterfront
- an environmentally responsible **marina**
- a **cycling path** from Blaine to Tswassen ferry terminal

You want the City to take **no more of your money** than necessary and constantly look for **ways to save**.

I will continue working to get you even better **value for your tax dollars**.

You expect your elected representatives to work hard. And I have:

- excellent **attendance record** for Council meetings
- delivered the following **reports**:
 - Arts Centre Task Force Report
 - Social Strategy
 - Housing Diversity Task Force Report
 - Report from WALK21
 - Mayor's Task Force on Waterfront Parking
 - Policy paper on smoke-free public spaces
 - Interim Cultural Strategy
- frequently updated my website where I discuss local issues – **MattTodd.ca**

I'm open-minded, do my homework & think long-term.

You can always count on me to be **honest** about how I see things.

We need councillors more interested in **building agreement** than proving their differences. I have a proven record of finding **common-ground solutions.**
